NCast™

CUSTOMER PROFILE

Education

"NCast is something I've fallen in love with, mainly because of its ease of use,"

LSU, Center for Computation & Technology, Daniel Eiland.

We recorded all lectures with NCast

Louisiana State University (LSU) deployed NCast Telepresenters to capture, stream and record all lectures of "Introduction to High Performance Computing" to universities around the world – students were enrolled and graded in the course.

Present experts in the field to other universities

"One of the things we are endeavoring to do with courses like this is to present people who are considered experts in their field to institutions whether they may be community colleges or large universities."

NCast allowed students to access material after the lecture

Used to record lectures for later viewing by students
Combined video, presentation material, desktop viewing, etc. into one compressed video stream.
Students accessed the web recording

"Perhaps one of the most interesting developments was students made extensive use of videos (of the lectures) out of class."

NCast got better student reviews

"NCast got better student reviews because the students just sat down and it just worked."

Institutions participating

The Center for Computation and Technology at Louisiana State University (supported by NIH grant)
University of Arkansas
Louisiana Tech University
Masaryk University (Czech Republic)
MCNC
15 to 20 more universities interested in participating
