

NEW PRODUCT FACT SHEET – PR-Mini Series

NCast Announces Video Capture Breakthrough

NCast has developed a new capture station that is a breakthrough of affordability, quality and size making video capture within the reach of nearly everyone's budget while maintaining a significant feature set that is highly sophisticated in its simplicity. The new PR-Mini is ideal for video recording for universities, community colleges, city governments, churches, and corporate applications. And now, it is within the budget reach for K-12 school districts.

Either a fixed lens or zoom lens video camera is included as an integral part of the station which can be mounted to a ceiling or wall with the accessory mounting kit so that the camera can be easily pointed in the desired direction.

A partial feature list is:

- Integrated camera with the video capture recording station. Future units in the series will have HDMI input capability
- Small but powerful design—less than 1lb.
- 1080p – 30fps full frame capture
- Stream through a network and record simultaneously
- Intuitive and robust webpage interface similar to NCast's full-featured Presentation Recorder product family interface
- Potential time-delayed upload to up to two receiving locations
- Wi-Fi capable making network wiring unnecessary
- USB audio input
- 32GB storage upgradable to 128GB
- MSRP for both units below \$700. Price will vary with camera options
