

# Telepresenter™ M3 vs. Telepresenter™ G2

*An addendum to “Capturing Conference Presentations”*

In the “Capturing Conference Presentations” Whitepaper (<http://www.ncast.com/pdf/NCast-WP-Capturing%20Conference%20Presentations.pdf>), NCast co-founder Larry Rowe proposed using the Telepresenter™ G2 for Classroom Lecture Capture. The article asserts that the RGB-style capture of the G2 gives the content producer better quality at a lower cost than even off-the-shelf freeware solutions.

Since this article was done, NCast has released the Telepresenter™ M3. The M3 embeds most of the Kramer functionality, bringing Picture-in-picture capability to the Telepresenter line. With the M3, Conference Presentation Capturers get some real benefits:

Feature	Telepresenter G2	Telepresenter G2 with Kramer	Telepresenter M3
Graphics Input Resolution (Max)	1024x768	1024x768	1600x1200
Graphics Output Resolution (Max)	1024x768	1024x768	1600x1200
Video Input Resolution	SD	SD	720p HD
Picture in Picture Support	None	Yes—2 camera feeds	Yes—One Camera feed
Price	\$5495	\$7,095	\$9,995
